Nowadays some teenagers are supposed to be unhealthy. So what caused problem for young people.

Firstly, As my opinion, time is always changing and people too. For example, twenty years ago children were absolutely into being healthy. They did some sports, did charities to improve their lives.

From other hand, people realise how terrible is it when they are not capable of taking breathing fresh air. We desperately want to be healthy but we do nothing. People are always saying that they do not have enough time for doing such things. Someday we should think it over. What have we do to solve the pollution. Recycle bottles, grow new trees and just pay attention to our environment.

To sum up, I just want everyone to admit that everything is depends on us and it is only one chance to make the right decision.
